NEDA Goals

- Bring together all existing information on Goal 19 protected ecological resources
- Prepare visual data layers of resources, as possible, for OMM
- Produce "ecological hotspot" maps for decision-making, OMM
- Establish future goals for acquiring and analyzing data
- Develop scientist network for future collaboration

Workshop Goals

- Familiarize scientific experts with TSP/NEDA
- Feedback from scientific experts on NEDA progress:
  - Data sets
    - Complete? Appropriate?
  - Final data layers
    - Correct/appropriate display?
  - Data prep for Marxan
    - Chosen the best way to translate into Marxan grid?
    - Target weighting (within topic, among topics)
  - Marxan outputs
    - Areas lit up appropriate? What's missing?

Workshop Format

- Participants are invited scientific experts on Oregon's resources, in 3 topic areas:
  - Fish
  - Birds & Mammals
  - Ecosystem/Ocean
- Mixture of presentations, breakout groups by topic area
- Feedback collected from participants:
  - Note taking
  - Feedback forms
  - Posters
- Public comment taken by comment cards

Round-robin introductions

- Name, affiliation
- Topic area/expertise
- Personal goals for participating in the workshop
